

### Coronavirus Bulletin 1<sup>st</sup> June 2020

We have now reopened all sites that were shut during the Lockdown period but under far stringent guidelines.

Each site is reviewed to assess the works. This is in the form of risk assessments and safe methods of working within the current Covid 19 guidelines provided by the government and the Construction Leadership Council.

By implementing adequate safety systems (signs, safe access routes, face masks, correct PPE and so on) together with our suppliers reopening, we have managed to open all our sites but with limited numbers of trades.

Finally, Bradford Watts continue to be committed to completing all contracts as soon as possible and are open for business for future contracts.

Kind regards and stay safe.

The Directors of Bradford Watts
